Multi Cart Side View and
Collapsed View

Carry Your Gear and Equipment with Ease!

Got musical equipment, small drums, small PA's, DJ racks, photo/video, keyboards to move? The Rock N Roller R6 cart tough enough to handle 500 pounds of gear. It only weighs 25 pounds to make it really easy to manage!

Rock N Roller R6 Cart Features:

- 8-in-1 design so you can configure it to meet your needs
- Telescoping frame and folding sides handle awkward loads
- Pneumatic wheels for easy rolling
- Frame telescopes 28"-42.5" in length
- 24" foldable sides to stack loads high
- 8" x 2.50" pneumatic rear wheels
- 4" x 1" swivel caster front wheels
- Load capacity: 500 lbs./32 cu. ft.
- Weight: 25 lbs.
- Revolutionary frames instantly transform Into eight configurations
- Textured powder coat finish is extremely tough and environment-friendly
- Non-skid frame bed surface resists load slippage
- Strong tube axles 43% lighter than solid axles
- Stairclimbers standard on all models
- Spring-loaded wing-bolts won't vibrate out
- Foldable sides rotate and lock into place by pressing release cables
- Expandable frame accommodates innumerable cargo sizes and shapes
- Strong perforated front axle reduces weight and accommodates bungee cords

Instantly transforms into 8 configurations

The Rock N Roller R6 cart changes shape to meet your gear-hauling needs! Its 8-in-1 flexibility allows you to use the R6 as a conventional 2-wheel hand truck or a 4-wheel carriage, all with a few quick adjustments. And here's the best part: the R6 changes from 2-wheel to 4-wheel mode in about two seconds!

Telescoping frame and folding sides handle awkward loads

The R6's non-skid frame bed surface resists load slippage. In addition, the folding sides rotate and lock into position by simply pressing release cables. In 2-wheel mode the R6 hand truck's long nose ergonomically pulls bulky loads toward the user to make lifting easier.

Pneumatic wheels for easy rolling

The Rock N Roller R6 uses patent-pending pneumatic swivel casters that are very lightweight, strong, and have a special dampener to resist wheel wobble. They also feature quick-change pop-off wheels for smaller storage profile and easy use in the field. The R6's pneumatic wheels absorb shock to delicate equipment and smoothly roll over rough surfaces such as dirt, grass, and concrete. Tires have inner tubes for easy maintenance. Specially designed polymer hubs with roller bearings are up to 40% lighter than steel hub wheels.
